SUMMARY

I am a **Software Engineer**, enthusiastic and detail-oriented, with hands-on experience in **Data Analytics, Excel, and MS Office**. Skilled in **data management, documentation, record handling, and digital correspondence**, I bring strong **organizational and analytical abilities** to office operations. I have a good command of **modern office tools, file management systems, and communication software**, ensuring efficient workflow and accuracy in all clerical and administrative tasks. My goal is to contribute to a professional environment with **technical proficiency, reliability, and attention to detail**.

EDUCATION

Software Engineering

Mehran University of Science and Technology · jamshoro · 2023

SKILLS

- Proficient in **MS Office (Word, Excel, PowerPoint)**
- Strong **data entry and documentation** abilities
- Knowledge of **Python** and **data analysis tools**
- Excellent **organizational and record-keeping** skills
- Familiar with **digital correspondence and file management systems**
- Good **communication and teamwork** abilities
- High **numerical accuracy and attention to detail**
- Ability to handle **administrative tasks efficiently**
- Time management and multitasking skills

EXPERIENCE

Office Assistant

On intreneee

June 25 – October 2024

- Managed daily office documentation and data entry with accuracy.
- Prepared and maintained digital and physical records.
- Assisted in handling emails, reports, and official correspondence.
- Used **MS Office tools** (Word, Excel, PowerPoint) for reports and data management.
- Ensured timely completion of administrative and clerical tasks.

web Developer

Spark foundation

June 2022 – December 2022

- Designed and implemented responsive web interfaces using HTML, CSS, and JavaScript. Worked closely with cross-functional teams to gather project requirements and integrate front-end components with back-end developers. Ensured cross-browser compatibility and optimized code for improved site performance.

PROJECT

Hospital Management System (Final Year Project)

- Built a full-stack system for patient, doctor, and staff management using **Python (FastAPI/Django), React.js, and PostgreSQL**.
- Implemented role-based authentication, appointment booking, and medical records management

Customer Churn Prediction Model

- Built a machine learning model in **Python (Scikit-learn, Pandas, NumPy)** to predict customer churn.
- Achieved actionable insights for retention strategies by analyzing customer behavior data.

CERTIFICATIONS

MS Office | SukKur IBA

- Strong expertise in formulas, Pivot Tables, VLOOKUP, and data analysis

6-Month Computer Course in MS Office
